JJ now in leading group

There's plenty of time to win a trip to the US port of Charleston, compliments of Novell SA and The Star **COMPUTING**, in our Follow Novell Around The World.

All you have to do is a bit of research — and read **COMPUTING** for questions and clues.

Novell SA, for those who still think it is only a software company, is a yacht skippered by South Africa's JJ Provoyeur in the BOC Around Alone Challenge — a single-handed race around the world.

At the end of the event (hopefully mid-May) the winning reader will fly to the USA to meet Provoyeur and rub shoulders with the world's bravest yachtsmen and women.

The third leg of the race, Sydney to Punta del Este, is now well under way. It started from Sydney harbour late last month and our JJ is among the leading five.

The journey, which takes them into the ocean south-east of Australia and around the tip of South America, is considered extremely dangerous due to ice, storms and remoteness. Even though JJ is not yet leading, this is the leg where anything can happen.

Today's questions are:
1) How many hours will JJ gain or lose travelling between Punta del Este and Sydney?
2) What are Novell's two main interests in the software industry?

And for those of you who couldn't get The Star whilst on holiday in that port in Natal which definitely won't see the BOC challengers, here are all the questions to date:
■ What was Novell's second port of

call?
■ What was Novell's previous name?
■ What is this "growler" that sailors fear so much?
■ What address would a yachtsman give for Heard Island?
■ Why would JJ have been happy to reach Sydney before Christmas?
■ Who was the race leader until the Sydney leg and what happened to HER (clue!).

RULES

The judges' decision is final. No correspondence will be entered into. Each participant is allowed one entry only. Anyone sending in more than one will be disqualified.

The winner will be judged according to a series of answers to questions posed in **COMPUTING** between November 29 and the expected finish at the beginning of May.

The final entry form will be published only at the end of the race. Hold back all your answers until then.

Neither The Star nor **COMPUTING**'s staff will handle questions regarding the competition from readers. If you've missed an issue buy a back copy from The Star at 47 Sauer Street, Johannesburg, or ignore that week's questions. Judging is based on the highest average of questions answered correctly.

COMPUTING appears on Tuesdays but only in Edition 4. The other editions do not contain **COMPUTING** (except when it appears in the main body, when there is not enough advertising support to justify the usual pull-out supplement). There was a break in publication between December 13 1994 and January 17 1995, when the first **COMPUTING** of this year appeared.

Do not forward any answers to **COMPUTING** until the very end when we publish an entry form.

The winner will receive a single air ticket to Charleston via either Miami or New York as well as a week's accommodation in Charleston, probably at the end of May, depending on race progress.
